

This is the instruction to create an instance of IBM Speech to Text, and IBM Language Translator. IBM Speech to Text is a service that converts speech in audio format into text. Watson Speech to Text is a service that uses deep learning algorithms to convert speech to text. IBM Language Translator converts one language to another.

NOTE: In order to complete this the lab in this section you will be creating an IBM Cloud account and create an instance of IBM Speech to Text and IBM Language Translator and obtain their respective API Keys. A credit card is NOT required to sign up for IBM Cloud Lite account and there is no charge associated in creating a Lite plan instance of the Watson VR service.

## Step 1: Create an IBM Cloud Account

Click on the link below to create an IBM cloud account:

[Sign Up for IBM Cloud](#)

On the page to which you get redirected by clicking on the link above, enter your **email address, first name, last name, country or region**, and set your password.

NOTE: To get enhanced benefits, please sign up with you company email address rather than a free email ID like Gmail, Hotmail, etc.

If you would like IBM to contact you for any changes to services or new offerings, then check the box to accept the box to get notified by email. Then click on the Create Account button to create your IBM Cloud account. **\*\*If you already have an IBM Cloud account you can just log in using the link above the Email field (top right in the screenshot below).**

IBM Cloud

Sign up for an IBMid and create your IBM Cloud account

Build on IBM Cloud for free with no time restrictions

**Guaranteed free development with Lite plans**  
Develop worry-free and at no cost with cap based Lite plan services for as long as you like.

**Start on your projects right away**  
Skip entering your credit card info and get working in just a few short steps.

**Get a \$200 credit when you upgrade**  
After you upgrade to a Pay-As-You-Go account, you can use the credit to try new services or scale your projects. The credit is valid for 1 month and can be used with any of our IBM Cloud offerings.

## Step 2: Confirm Your Email Address

An email is sent to your email address to confirm your account.

**Thanks!**

To complete your registration, check your email.

Can't find the email? [Resend](#)

Go to your email account, and click on the "**Confirm Account**" link in the email that was sent to you.

Hello your\_firstname,

Thank you for signing up for  
IBM Cloud! Confirm your  
account to get started.

[Confirm Account](#)

By confirming your account, you accept the [Terms  
of Use](#)

Welcome and happy building!

—

Thank you,

IBM Cloud

---

### Step 3: Login to Your Account

# Success!

You successfully signed up for an IBM Cloud account and it is now activated.

Log in

When you click [Log in](#), you will be redirected to a page to log into your IBM Cloud account.

## Log in to IBM

Don't have an IBMid?

[Create an account](#)

## Step 4: Create a Speech to Text Instance

To create a speech to text instance click [Speech to Text](#)

On the next page, you will get to name your service instance and choose your region. Click on the arrow to reveal the drop-down menu of regions. Make sure to select the region that is closest to you. Since I am located in Canada, then I am choosing Dallas as my region since it is the closest region to me.

## Speech to Text

Lite • IBM

The Speech to Text service converts the human voice into the written word. It can be used anywhere there is a need to bridge the gap between the spoken word and their written form, including voice control of embedded systems, transcription of meetings and conference calls, and dictation of email and notes. This easy-to-use service uses machine intelligence to combine information about grammar and language structure with knowledge of the composition of the audio signal to generate an accurate transcription. The following languages and features are currently available:

AUTHOR: IBM  
PUBLISHED: 06/28/2019  
TYPE: Service

**Service name:**  
Speech to Text-n6

**Choose a region/location to deploy in:**  
Dallas

**Select a resource group:**  
Default

**Tags:**  
Examples: env:dev, version-1

### Features

- Available Languages**  
English (US), English (UK), Japanese, Arabic (MSA, Broadband model only), Mandarin, Portuguese (Brazil), Spanish, French (Broadband model only), Korean
- Metadata**  
Receive a metadata object in the JSON response that includes confidence score (per word), start/end time (per word), and alternate hypotheses / N-Best (per phrase). A new option for returning word alternatives per (sequential) time intervals is now available.
- Mobile SDKs (BETA)**  
Mobile SDKs are now available to enable native interaction on iOS and Android devices.
- Keyword Spotting (BETA)**  
Optional ability to search for one or more keywords in the audio stream. The returned metadata includes the beginning time, end time and confidence score for each instance of the keyword found.
