

If you have not created a Watson service before proceed with Step 1, otherwise go to Step 2:

Step 1: For New Users (with no Watson service):

For this project, you will use your IBM Watson Studio account from the previous chapter.

Go to the IBM Cloud Watson Studio page:

[Click here](#)

You will see the screen in the figure below. Click the icon in the red box:

The screenshot shows the IBM Cloud Watson Studio pricing page. The page has a dark header with the IBM Cloud logo and a search bar. Below the header, there's a section for 'Watson Studio' with tabs for 'Lite', 'IBM', 'Service', and 'IAM-enabled'. The 'Lite' tab is selected. On the right, there's a 'Summary' section with details about the plan: Region: Dallas, Plan: Lite, Service name: Watson Studio-jr, Resource group: Default. Below this, there are buttons for 'Create', 'Add to estimate', and 'View terms'. The main content area shows a table of plans. The 'Lite' plan is highlighted with a red box around the 'Create' button. The table lists features and pricing for each plan.

PLAN	FEATURES	PRICING
✓ Lite	1 authorized user 50 capacity unit-hours monthly limit 1 free small compute environment with 1 vCPU and 4 GB RAM (does not require capacity unit-hours)	Free
Standard v1	1 authorized user + unlimited viewer collaborators 50 capacity unit-hours included monthly (additional capacity available) Unlimited elastic compute environments Capacity Type: 1 vCPU and 4 GB RAM = 0.5 capacity units required per hour Capacity Type: 2 vCPU and 8 GB RAM = 1 capacity units required per hour Capacity Type: 3 vCPU and 12 GB RAM = 1.5 capacity units required per hour Capacity Type: 4 vCPU and 16 GB RAM = 2 capacity units required per hour Capacity Type: 8 vCPU and 32 GB RAM = 4 capacity units required per hour Capacity Type: 16 vCPU and 64 GB RAM = 8 capacity units required per hour Decision Optimization = (Capacity Type) * 20 capacity units required per hour	\$99.00 USD/Instance \$0.50 USD/Capacity Unit-Hour \$99.00 USD/Authorized User
Enterprise v2	5 authorized users + unlimited viewer collaborators 5,000 capacity unit-hours included monthly (additional capacity available) Unlimited elastic compute environments Capacity Type: 1 vCPU and 4 GB RAM = 0.5 capacity units required per hour Capacity Type: 2 vCPU and 8 GB RAM = 1 capacity units required per hour Capacity Type: 3 vCPU and 12 GB RAM = 1.5 capacity units required per hour Capacity Type: 4 vCPU and 16 GB RAM = 2 capacity units required per hour Capacity Type: 8 vCPU and 32 GB RAM = 4 capacity units required per hour Capacity Type: 16 vCPU and 64 GB RAM = 8 capacity units required per hour Decision Optimization = (Capacity Type) * 20 capacity units required per hour HIPAA readiness option available in Dallas Multi-Tiered	Expand each section to view details

Then click **Watson**, as shown below:

Consult with IBM

Get the most out of your IBM Cloud account by working with our consultants. Learn how to develop for the cloud, leverage Watson APIs, rearchitect an existing application, or experience the design thinking process in action.

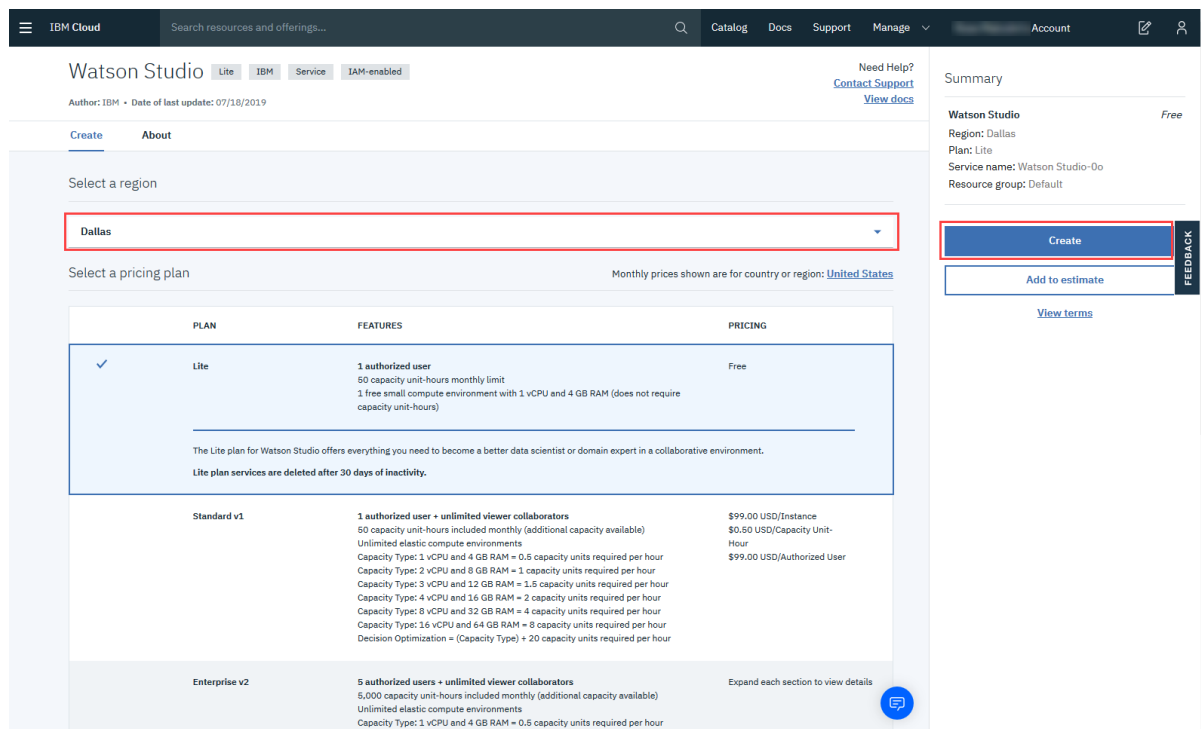

IBM Watson Studio

Collaborate to find insights fast. Visualize and manipulate data with code, graphical tools, or APIs. Develop models and neural networks with powerful algorithms and popular frameworks.

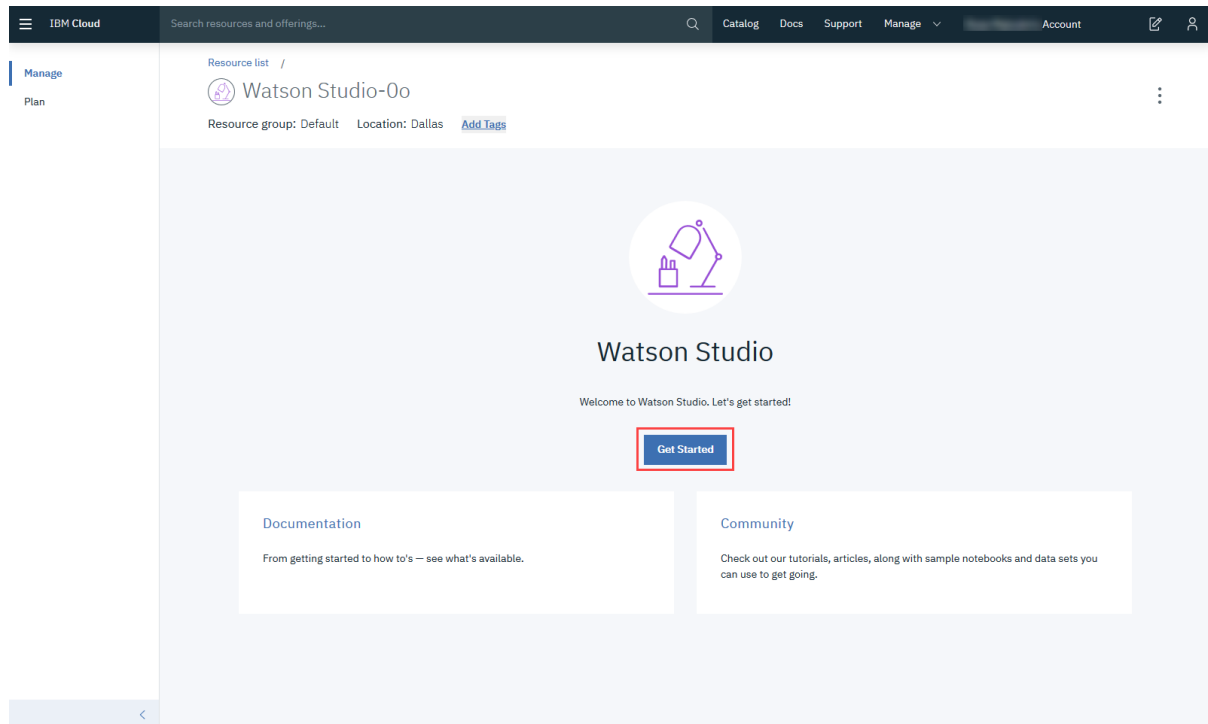

Scroll down and select **Watson Studio - Lite**.

To create a Watson service using the Lite plan, click **Create**.

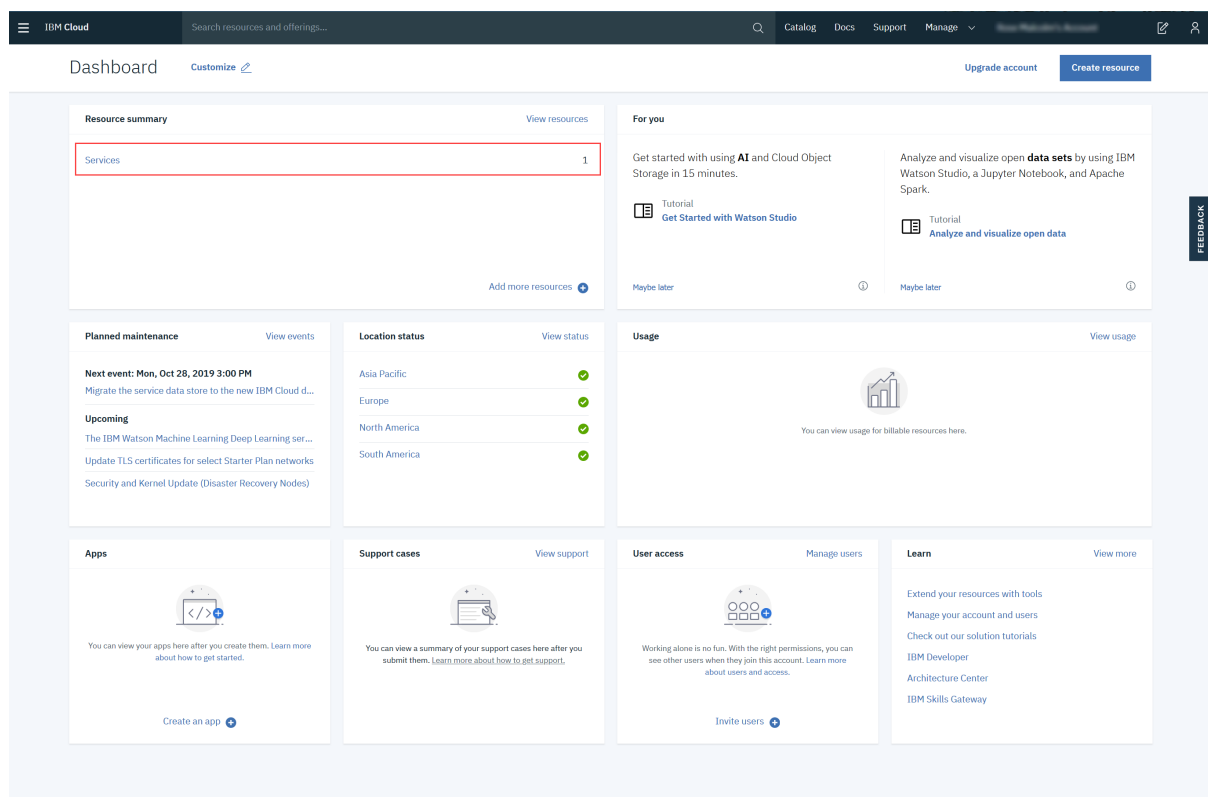

Now click **Get Started**.

After creating the service continue with Step 2.

Step 2: For Existing Users (who already have Watson Service):

Go to the IBM Cloud Dashboard and click **Services**.

When you click on Services, all your existing services will be shown in the list. Click the **Watson Studio** service you created:

Resource list

Name	Group	Location	Offering	Status	Tags
Watson Studio-0o	Default	Dallas	Watson Studio	Provisioned	—

Then click **Get Started**.

Step 3: Creating a Project

Now you have to Create a project.

Click on **Create a project**:

On the Create a project page, click **Create an empty project**

Provide a **Project Name** and **Description**, as shown below:

New project

Define project details

Name

Python Basics for Data Science Project

Description

This is the Python Basics for Data Science Project.

Choose project options

☐ Restrict who can be a collaborator ⓘ

Project will include integration with [Cloud Object Storage](#) for storing project assets.

Define storage

① Select storage service

Add

Add an object storage instance and then return to this page and click Refresh.

② Refresh

Cancel

Create

You must also create storage for the project.
Click **Add**

Cloud Object Storage

IBM Cloud Object Storage is a highly scalable cloud storage service, designed for high durability, resiliency and security. Store, manage and access your data via our self-service portal and RESTful APIs. Connect applications directly to Cloud Object Storage use other IBM Cloud Services with your data.

Features

Storage for the IBM Cloud

IBM Cloud Object Storage provides unstructured data storage for cloud applications. Libraries and SDKs support a common set of S3 API functions for connecting new applications to scalable cloud storage and integrating your data into other services on the IBM Cloud Platform as well as IBM Watson services. IBM Cloud Object Storage is available with Regional, Cross Region and single site resiliency options worldwide.

Built-in Aspera high-speed transfer

With IBM Cloud Object Storage Aspera high-speed data transfer, you can improve data transfer performance by quickly transferring data over long distances, and under various network conditions. It is natively integrated into Cloud Object Storage and there is no additional cost for uploading data.

Storage Classes and Archive Policy

Choose storage classes based on your usage patterns for active, less-active, and cold workloads with Standard, Vault, and Cold Vault respectively. Use Flex class for dynamic data access with usage patterns that are hard to predict. For rarely used data that requires long-term retention, simply set an Archive policy with our existing storage-class tiers allowing you to reduce costs even further with our lowest priced Archive storage.

Access and Key Management

IBM Identity and Access Management (IAM) policies allow for granular access control at the bucket level using role-based policies. Key Protect support allows customers to have their own managed encryption keys for higher level data security.

Pricing Plan: Monthly Process shown above reflect the: **United States**

PLAN	FEATURES	PRICING
<div><div><div>● Lite</div></div></div>	1 COS Service Instance Storage up to 25 GB/mo. Up to 20,000 GET requests/mo. Up to 2,000 PUT requests/mo. Up to Data Retrieval 10 GB/mo. Up to 5GB Public Outbound Applies to aggregate total across all storage bucket classes	Free
<div><div><div>○ Standard</div></div></div>	There is no minimum fee, so you pay only for what you use.	Expand each section to view details

Document your project using standard Markdown syntax. See the [Markdown cheatsheet](#).

In the list of asset types, click **Notebook**:

On the New Notebook page, enter a name for the notebook, and then click **From URL**.
Copy this link:

https://cocl.us/PY0101EN43_EDX

Paste it into the **Notebook URL** box, and then click **Create Notebook**.

The screenshot shows the 'New notebook' form in IBM Watson Studio. The 'From URL' tab is selected. The 'Name' field contains 'Lab - Loading Data and Viewing Data'. The 'Description (optional)' field is empty. The 'Notebook URL' field contains 'https://cocl.us/PY0101EN43_EDX'. The 'Create Notebook' button is visible at the bottom right. The form also shows a 'Select runtime' section with 'Default Python 3.6 XS (2 vCPU and 8 GB RAM)' selected. There is a 'Cancel' button and a 'Create Notebook' button at the bottom.

You will see this Notebook:

Introduction to Pandas Python

Welcome! This notebook will teach you about using `Pandas` in the Python Programming Language. By the end of this lab, you'll know how to use `Pandas` package to view and access data.

Table of Contents

- About the Dataset
- Introduction of Pandas
- Viewing Data and Accessing Data
- Quiz on DataFrame

Estimated time needed: 15 min

About the Dataset

The table has one row for each album and several columns

Add Data to Project

Hi there,

Congratulations on getting your project started!

The next step is to bring some data to start analyzing. All collaborators in the project are automatically authorized to access the data in the project. You can add data assets to your project from many sources.
